Safe A Life Cymru

Request to encourage residents to understand the importance of learning CPR (Cardio Pulmonary Resuscitation) and using a defibrillator. Every year, in Wales, over 6,000 people will have a cardiac arrest and at least 80% will happen in the home. Currently less than 5% will survive a cardiac arrest if it happens in the community. Save a Life Cymru’s mission is to equip the people of Wales with lifesaving CPR and defibrillation skills to help reduce the number of people who die as a result of a cardiac arrest.
